

UNG FACILITIES PLANNING & GIS

Version 2.1

December 2025 / May 2026

*Merges five campus source feature classes into the enterprise TEMP.gdb
Campus_Floor_Plans*

CampusFloorPlansMerge_V2.1.py

Purpose

Combines BRC_FLOORPLANS, CC_FLOORPLANS, DC_FLOORPLANS, GC_FLOORPLANS, and OC_FLOORPLANS into a single unified Campus_Floor_Plans feature class in TEMP.gdb. This merged feature class is the source for the FICM CFP Prep step, the FloorPlanExporter, and the space reports. Also enables editor tracking and touches the .gdbtable timestamp so the feature class shows the correct modified date in ArcGIS Catalog.

When to Run

- Weekly, as Step 6 of the pipeline, after the PROD updater (Step 5) completes

Requirements

- ArcGIS Pro / arcpy
- All 5 PROD feature classes updated by Step 5

Inputs

Item	Value	Notes
BRC_FLOORPLANS	UNG_ENTERPRISE_UPDATE D_WORKING.gdb\UNG_BR\	117 records
CC_FLOORPLANS	UNG_ENTERPRISE_UPDATE D_WORKING.gdb\UNG_CC\	204 records
DC_FLOORPLANS	UNG_ENTERPRISE_UPDATE D_WORKING.gdb\UNG_DC\	5,961 records
GC_FLOORPLANS	UNG_ENTERPRISE_UPDATE D_WORKING.gdb\UNG_GC\	1,922 records
OC_FLOORPLANS	UNG_ENTERPRISE_UPDATE D_WORKING.gdb\UNG_OC\	232 records

What It Does

- Creates a timestamped backup of the existing Campus_Floor_Plans in TEMP.gdb
- Merges all five campus feature classes into a fresh Campus_Floor_Plans
- Runs a submodel that applies field calculations and null-safe string operations
- Enables editor tracking with four timestamp fields (created_user, created_date, last_edited_user, last_edited_date)
- Touches both the TEMP.gdb folder and the Campus_Floor_Plans.gdbtable file with os.utime() so the modified timestamp is accurate in ArcGIS Catalog

Outputs

Item	Value	Notes
Campus_Floor_Plans	TEMP.gdb	8,436 records — all campuses merged
Backup FC	TEMP.gdb	Campus_Floor_Plans_backup_YYYYMMDD_HHMMSS

Version Notes

V2.1: Added `os.utime()` call on `Campus_Floor_Plans.gdbtable` so ArcGIS Catalog shows the correct modified timestamp — previously the FC showed the prior run date even after a successful merge

V2.0: Added null-safe string operations throughout; fixed `AttributeError` on null notes field
