

UNG FACILITIES PLANNING & GIS

Version 4.4

March 2026

Reconciles GIS space inventory against Banner FAC030 export and flags discrepancies

Banner_Action_List_AllCampus_V4.4.py

Purpose

GIS is the authoritative record for room existence and attributes. This script compares the GIS floor plan data against the Banner FAC030 space inventory export and produces a color-coded action list showing where the two systems disagree. Covers all five campuses in one run. One Excel workbook per campus, one tab per building.

When to Run

- Step 10 of the pipeline — final step
- Requires a fresh Banner FAC030 export and a fresh GIS CSV export
- No ArcGIS required — reads CSV files only

Inputs

Item	Value	Notes
GIS CSV export	ALL_CAMPUS_GIS_MMDDYY YY.csv	Export Campus_Floor_Plans attribute table from ArcGIS Pro; includes BLDG_NAME, campus, room_num, floor_number, sq_ft, FICM, notes, seats
Banner CSV export	john_segars_fac030_MMDDYY YY.csv	FAC030 report exported from Banner; includes bldg_code, room_num, room_desc, use_code, room_sq_ft, sta_num

Domain Translation

ArcGIS Pro exports coded domains as descriptions by default. The script reverses all four coded domains automatically: BUILDINGCODES (building name to code), CAMPUS (description to name), LEVEL_NUMBER (floor description to numeric), BOR_RUSE_CODE (FICM description to code). GDB typos are matched exactly.

What It Does

- Loads and normalizes both CSV files
- Translates all domain descriptions back to codes
- Groups by campus using Banner bldg_code prefix (DA, GA, CU, BR, OC)
- Produces per-building step-by-step status with color coding
- Calculates Banner Room Sum and ZLTFOVR vs Banner variance for each building

- Writes one workbook per campus with Campus Summary, per-building Sum, and per-building Actions tabs

Outputs

Item	Value	Notes
Dahlonaga_TIMESTAMP.xlsx	Reconciliation\CampusReports\	Campus summary + 33 building tabs
Gainesville_TIMESTAMP.xlsx	Reconciliation\CampusReports\	Campus summary + 19 building tabs
Oconee_TIMESTAMP.xlsx	Reconciliation\CampusReports\	Campus summary + 6 building tabs
Cumming_TIMESTAMP.xlsx	Reconciliation\CampusReports\	Campus summary + 1 building tab
Blue_Ridge_TIMESTAMP.xlsx	Reconciliation\CampusReports\	Campus summary + 2 building tabs

Version Notes

V4.4: Added Banner Room Sum and ZLTFOVR vs Banner Room Sum variance row to every building summary

V4.2: Full domain normalization from actual GDB schema

V4.0: Multi-campus expansion with one workbook per campus and Campus Summary tab
